EXPERIENCE

Software Developer — Code Éxitos

San Pedro Sula, Honduras | 2022 – 2025

- Developed and optimized a scalable web platform for a U.S. client, used by over 500,000 users, designed to streamline job placement by connecting professionals with hiring companies. The technologies used were React, NestJS, and AWS.
- Worked on developing a vehicle sales platform for a Canadian client, focusing on enhancing the user experience and optimizing the overall performance of the application. The technologies I used were Vue, NestJS, and AWS.
- Contributed to the development of an internal enterprise management platform to centralize company data. I also worked on building analytics dashboards to visualize key business metrics and support data-driven decision-making. The technologies I used were Vue, NestJS, and Azure.
- Created a mobile application for event attendee registration, incorporating features such as barcode scanning and manual data entry for an improved user experience. The technologies I used were React Native, NestJS, Next.js, and DigitalOcean.
- Designed and developed a platform for renting and selling electric vehicles, integrating payments and improving the infrastructure to provide efficient and secure services. The technologies I used were Golang, and DigitalOcean.
- Implemented interactive applications for medical events, integrating multimedia content and quizzes to increase attendee engagement. The technologies I used were Next.js, and DigitalOcean.
- I worked on migrating a time-tracking web application for a U.S. client, contributing to the platform's growth from 100,000 to over 1 million users. The technologies I used were NuxtJS, .NET, and AWS.
- Developed an internal analytics dashboard to monitor and visualize GitHub Actions across all company repositories, providing centralized insights into CI/CD workflows, execution status, and performance metrics. The technologies I used were Vue, Django, and DigitalOcean.

PERSONAL PROJECTS

- Level Up — Gym progress tracking app built with Next.js and Supabase. (level-up-gilt.vercel.app)

SKILLS

Frontend: React, Next.js, Vue, React Native, TypeScript, HTML5, CSS3, Tailwind CSS, ApexCharts

Backend: Node.js, NestJS, Express.js, Golang, .NET

Databases: PostgreSQL, MongoDB, MySQL, Supabase

Testing & CI: Cypress, Playwright, Jest, GitHub Actions

Cloud & Tools: AWS, Azure, DigitalOcean, Docker

AI: Claude, Cursor

Languages: TypeScript, JavaScript, C#

EDUCATION

Mechatronics Engineering — UNITEC

San Pedro Sula, Honduras | 2012 – 2017

Master's in Finance — UNITEC

San Pedro Sula, Honduras | 2018 – 2021
